

ISAAC SEMAKULA

I am Isaac Semakula, a minister serving God in the Jesus Power Church, in Kampala, Uganda. I am the Chief Technician at the church, responsible for operating and taking care of the church machines that produce sound and video.

When I met Todd Klipp I was stranded in my senior six year with no plan of going on with my studies. I am really blessed to have Todd in my life. He did his best to see that I went back to school.

With Todd's help I was really so much blessed to take a computer course called *Computer Repair and Maintenance*. It was a very good course that lasted for nine months. I really learned a lot about computers, including repairing them, solving technical problems, partitioning hard disks, and so many other things.

I now hold a certificate in computer repair and maintenance. I thank God who saw me through. God willing, I hope to upgrade to a diploma in the same course. When I complete my studies, I would like to get a job working with computers, and I believe I will have the skills and training to do that very well.

I am really pleased and happy for all that has been done for me. God bless you.

February 2009

**“I am really pleased
and happy for all
that has been done
for me.”**
